DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/14/2003 has been entered.

Applicants amendment of claim 71, Paper of 8/18/2003, is acknowledged. Applicants' arguments filed on 8/18/2003 have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. Claims 71 and 72 are still at issue and are present for examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 71 and 72 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as

Art Unit: 1652

to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The newly added limitation of claim 71 which recites "...non-aggregated" is not supported by the original disclosure. Applicants argument that support for "non-aggregated" is found in the Examples section in sections in which cells were trypsinized, centrifuged and then resuspended, thus resulting in said cells being inherently non-aggregated, is acknowledged, however this argument is not found persuasive. As has been previously stated with respect to previous limitations introduced by applicants while one may argue that a particular limitation is an inherent property of the taught preparation, it remains that such an "inherent" limitation is adequately supported. Such a limitation of "non-aggregated cells" is nowhere supported by applicants specification.

Applicant is referred to the revised guidelines concerning compliance with the written description requirement of U.S.C. 112, first paragraph, published in the Official Gazette and also available at www.uspto.gov.
